EDUCATION

Florida International University <i>B.S. in Computer Science</i>	Miami, FL Aug. 2026 – May 2029
Broward College <i>A.A. in Liberal Arts</i>	Fort Lauderdale, FL Aug. 2024 – May 2026
Relevant Coursework: <i>Artificial Intelligence (CAI 1001C), Statistical Methods (STA 2023), Calculus 2 (MAC 2312, in progress), Foundations of Analytics and AI (QMB 3302, in progress)</i>	

EXPERIENCE

Data Science Research Intern <i>Broward College - Crop Disease Classification Research</i>	May 2025 – Aug. 2025 Fort Lauderdale, FL
- Classified 6 crop diseases, as measured by ~90% validation accuracy on a 35,000-image dataset, by a TensorFlow and Keras CNN with an 80/20 split pipeline. - Validated model reliability, as measured by precision and recall on 7,000 held-out images, by confusion-matrix analysis across all 6 classes. - Presented crop-health findings, as measured by 200+ symposium attendees, by a talk on low-cost disease detection for local farmers and growers.	
Software Development Director <i>Society of Hispanic Professional Engineers (SHPE FIU)</i>	Sep. 2026 – Present Miami, FL
- Maintaining the chapter's member points system, as measured by \$150+ in annual national opportunities tied to its rankings, by HTML, CSS, and JavaScript updates scoped with chapter leadership. - Building chapter website features, as measured by 250+ active members served, by feedback sessions with leadership on usability and accessibility.	
Firmware New Member <i>Panther Rocketry Club (PRC), Florida International University</i>	Sep. 2026 – Present Miami, FL
- Earned a spot in PRC's mentored 6-week firmware program, as measured by selection from 250+ applicants, by a competitive application for rocket C development. - Developing a rocket telemetry simulator, as measured by 3 modeled forces (thrust, gravity, drag), by C code with a fixed-size altitude array and flight statistics reports.	

PROJECTS

World Cup Match Prediction Model <i>Python, SQL, SQLite, Pandas, scikit-learn</i>	Jul. 2026 - Present
- Built a SQLite match database, as measured by 2,300 cleaned international matches with per-match goals and win rate, by Pandas cleaning and SQL aggregation. - Engineered leakage-free features, as measured by 2,100 training examples, by pre-match-only history for a scikit-learn win/draw/loss classifier.	
Flood Risk Prediction Prototype <i>HTML, CSS, JavaScript, Open-Meteo API, OpenStreetMap</i>	Sep. 2026
- Delivered a working prototype, as measured by a 24-hour build at the Miami Civic Hack Day, by team collaboration in partnership with the county's resilience office. - Scored street flooding risk, as measured by 4,800 Miami grid points, by an algorithm of rainfall, tide level, elevation, and drainage data on a green-to-red heat map. - Added a preparedness chatbot, as measured by 5 covered topics, by rule-based logic with location-specific map context and public safety links.	

LEADERSHIP & INVOLVEMENT

Sep. 2026 – Present

First Year Leadership Program, SHPE FIU

- Earned a program seat, as measured by selection as 1 of 25 from 80+ applicants, by application to 6 leadership and communication workshops.

National Member

Sep. 2026 – Present

ColorStack

- Joined a national Black and Latinx CS community, as measured by participation across 4 events, by career, technical, and peer-networking programming.

Student

Apr. 2025 – May 2025

Stanford Code in Place

- Completed Stanford's online Python course, as measured by a graphical Breakout game with paddle physics and scoring rules, by functions, loops, and game-state logic.

TECHNICAL SKILLS

Programming Languages: Python, C/C++, SQL, JavaScript, HTML, CSS

ML Libraries & Frameworks: TensorFlow, Keras, scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Developer Tools: Git/GitHub, SQLite, VS Code, Jupyter Notebook, Google Colab
